

Pull Down BELTS

Need pull down belts In an emergency?

Or just replacing stock?

Lagged and glued belts have visible joins, an uneven finish, a weak bond and uneven wear. However the **Truly Endless** belts are moulded to create a stronger bond and accurate film feed. Superior in quality, with a ground finish, these specialty belts deliver an even wear for high performance applications.

ADM Packaging Technology stock a range of belts to suit most VFFS bagmakers, however we can also custom make belts to suit non-standard applications.

The belts are available in different duro grades and the service includes the mould, wrap, ultrasonic weld, vulcanise, slit and grind.

The belts are available in:

- High density polyurethane foam
- Polyurethane
- Linatex Rubber
- Natural Rubber
- Nitrile Rubber
- Dual Durometre
- Foam
- Silicon

Styles include:

- Plain
- Holes
- Grooved
- Countersunk holes
- Diagonal slots
- Stepped counterbore
