

# ADM Auger Doser

## Auger Doser

The Auger doser is designed to feed anti-caking agents for food processing lines. This compact design of minimal footprint can be placed in a variety of location and interface with most existing lines. A sensor is used to auto trigger the feed only when product is available. This requires little attention by the operator and a buzzer or stacklight can be used to indicate when the hopper level is low.

## Features

- Stainless steel construction
- Mobile stand
- Hopper with removable clamps for easy access
- Slim design (Minimal footprint size)
- Easy to clean.
- Variable speed drive
- Dual drive system stir& feed
- Applicable to most anti-caking agents

Model	ADM-AD60
Hopper size	100L
Screw size	60mm
Speed	Up to 250Kg/hr (Variable)
Hopper size	50L-200L
Power supply	415V 50Hz 0.7kW
