

ADM Industrial Power Sieve

The Industrial Power Sieve is a vibratory hopper system that is used to break up and screen product. At ADM we developed the Industrial Power Sieve to break up clumped sultanas and raisins to improved the packaging process and product display quality.

Feature:

Durable reinforced stainless steel construction

Interchangeable mesh sizes

High/ Low sensor for fast and slow feeds

Up to 5G acceleration to break up products

Teflon coated mesh—Optional

Teflon coated main hopper— Optional

Platform& steps to AS1657

MADE IN AUSTRALIA

A Stainless steel construction. The Industrial Power Sieve uses Swiss vibration mount and Italian vibromotors to transfer up to 2 Tonnes of vibration force to the product. The Industrial Power Sieve also includes a fully automated feeding system to work in with the packaging machinery line.

Suitable for

- Raisins
- Sultanas
- Goji berries.
- Dried apricots
- Desiccated coconuts
- Parmesan/shredded cheese
- Screening for foreign products

Model	ADM-VH1
Hopper opening size	1400x1400 mm
Capacity	200kg power sieve (saltana), 50kg lower feed hopper
Feed rate	60kg/min max (saltana)
Speed	1800 rpm max
Power supply	415V, 50Hz, 1.1kW
Footprint inc platform	2900Lx2200Wx2400H mm
